SKILLS

- Python
- SQL (MySQL)
- NoSQL (MongoDB)
- Databricks
- Web Scraping
- Tableau
- Git-hub
- ML
- Deep Learning
- Azure
- NLP
- OpenCV
- Streamlit

LANGUAGES

- English
- Kannada
- Telugu

Education

- Vemana Institute of Technology
  (Mechanical Engineering) - Koramangala, Bengaluru

Graduation	Percentage	Passed year
B.E.	74.49	2022

- **Data Scientist trainee** at **INSOFE** from February-2022 to March-2023.

EXPERIENCE

- **Data Engineer at UsefulBI** from June-2023 to present

INTERNSHIPS

1. **Electric vehicles assembly**
   I have learnt Assembly of cars, vans, autos, etc. Without using any CNC machines.

2. **Implementing lasso regression from scratch without using sklearn packages**

   Using sklearn implemented the lasso regression algorithm and without sklearn packages implemented the lasso regression with python.

Data science projects

- **End to end project on car price prediction**
  Predicted car price using algorithms.

- **Project on Telco Customer Churn prediction.**
  In this project the data was taken from the guide and done Machine learning steps which are pre-processing, EDA, Encoding, Splitting, Scaling, Model building, Model training, model evaluation, then deployed the project using CI/CD pipeline (Jenkins) using docker, Jenkins, Git. Model was running successfully and able to access in the portal.

Data Engineer Projects:

Web Scraping

Scraping data from any website and converted that data to csv format, through that created a SQL tables and Queries.

Chatbot-MVP

Extracted data from clinical studies website and made created a SQL table.
